Experience

Job Oriented Value-Added Course (JOVAC), GLA University, Mathur June 2025 – July 2025

- Completed an intensive training program focused on Mobile Application Development using **Flutter**.
- Learned core concepts of cross-platform application development, responsive UI design, widget management, and state handling.
- Worked on developing mobile application interfaces with improved usability, navigation flow, and performance optimization.

Projects

“GigFlow” - A mini freelancer marketplace Jan 2026 – Feb 2026

- Developed complex hiring logic where selection of one bid updates gig status and auto-rejects other bids.
- Implemented CRUD operations for managing gigs with title, description, and budget details.

“WatchGuard SOS” – Women Safety Android App Mar 2026 – May 2026

- Developed an Android-based Watch Guard SOS Distress Alert Application with real-time location tracking and emergency SOS alert features for user safety.
- Implemented emergency contacts notification and live GPS location sharing for quick response during distress situations.

Accomplishments

Solved 100+ problems on leetcode .
